

AT YOUR ARRIVAL

Step 1. We will ask for your participation and you will be given all the information about the intervention.

Step 2. You will take the first alcohol test.

Step 3. You will be asked to fill in a simple questionnaire about alcohol and drugs.

Step 4. You will take a reaction test in our console for reaction time measuring.

You shall then proceed into the site, and we would please ask you to come back to us afterwards in order to finish the tests.

AT YOUR EXIT

Step 5. You will take a drug test.

Step 6. You will take the second reaction test in our console.

Step 7. You will then take the second alcohol test.

Step 8. You will fill in the second part of the questionnaire.

Step 9. By now, you will receive a special gadget in appreciation of your collaboration and a sheet with all the information on your results.

We shall give you too an analysis of what these results show and about how the aims of our project can be fulfilled with your help.
